

ASP FACTS

FEATURE: Agent Grip

ADVANTAGE:

The interspaced retention grooves of the Agent Grip allow a Snap-Loc™ Clip to be placed in a variety of positions along the length of a baton handle.

A baton with an Agent Grip can be carried tip up or tip down. The Crosstec surface combines with the spaced retention grooves to provide superior holding power.

SPECIFICATION:

- Machined
- Cross hatch pattern
- Continuous spiral overlay
- Spaced retention grooves

PERFORMANCE:

The combination of a Crosstec surface pattern with spaced retention grooves provides a superior tactical baton grip. The design resists mars, marks and wear. It will not abrade clothing.

SALES STRATEGY:

Explain the difference between the machined cross hatch pattern of the Agent Grip and the peaks of standard knurling.

Point out the continuous spiral cut and spaced retention grooves. Demonstrate the superior hold and range of clip adjustments of the Agent Grip.
