

# ASP FACTS

## FEATURE: Disc Loc

### ADVANTAGE:

The four internal locks of the Talon Baton provide positive extension. A push button allows the opposing discs to release the opposing discs to release the internal retention grooves. The baton is compatible with all existing ASP training and techniques.

### SPECIFICATION:

- 4130 steel tubing
- 7075 T6 aluminum alloy tubing
- Foamed vinyl grip
- Two internal tube stops
- Two pairs of opposing locking discs
- Ground steel release rod
- Two internal retention grooves
- Push to release

### PERFORMANCE:

The Disc Loc mechanism is elegantly simple, yet incredibly strong. Four steel discs lock the baton open. Internal retention grooves provide a solid hold. The lock consists of only 9 parts. It is closed with the simple push of a button.

### SALES STRATEGY:

*Show the minimal number of parts in the Talon Baton. Demonstrate the ease of extension, solid lockout and simple push button retraction.*
