

ASP FACTS

FEATURE: Leverage Cap

ADVANTAGE:

The unique profile of the Leverage Cap provides a dramatic increase in striking potential while retaining a Tactical Baton® during the most dynamic confrontations. The cap design increases the reach of the ASP Baton while improving control. The reduced grip diameter of the Leverage Cap replaces the standard cap of all ASP Expandable Batons.

SPECIFICATION:

- 6061 T6 aluminum
- Black industrial anodized
- Black powder paint coated
- Optional Electroless® nickel finish
- Optional Gold Band
- Optional Silver Band
- Optional Prestige® logos
- O-ring retention groove
- Fits all ASP Tactical Batons
- Reduced diameter finger grip
- Flared retention head

PERFORMANCE:

The Leverage Cap extends the reach, increases the retention, improves the control and increases the striking power of an ASP Baton a full factor. The little finger fulcrum principle of the Oriental sword allows an F16 or D40 Baton to strike like an F21 or D50. An F21 or D50 Baton strikes like an F26 or D60.

SALES STRATEGY:

Compare the reach, improved retention, dynamic control and increased striking potential of the Leverage Cap to other products on the market.
