

ASP FACTS

FEATURE: Flared Head Cap

ADVANTAGE:

The distinctive design of the expanded head retention cap retains the ASP Baton in a wet hand or when the officer is fatigued. Initially designed for officers who work in a marine environment, the enlarged cap provides improved retention and increased control in all operational settings.

SPECIFICATION:

- 6061 T6 aluminum
- Black industrial anodized
- Black powder paint coated
- Optional Electroless® nickel finish
- Optional Prestige® logos
- Tapered profile
- O-ring retention groove
- Expanded flat plane striking surface
- Fits all ASP Tactical Batons®

PERFORMANCE:

No other retention cap is as compact and projection free as the ASP Grip Cap. There is no protruding arm to become caught on equipment. There is no sharp radial edge. The clean appearance of this enlarged head cap allows snag free carry and a smooth draw. The cap provides increased control, improved retention and a flat plane striking surface.

SALES STRATEGY:

Demonstrate the improved retention and control of the baton, even when the grip is wet.
