

ASP FACTS

FEATURE: Cap Release

ADVANTAGE:

The Talon Baton cap provides a gross motor means of unlocking an expandable baton. There is no need to locate a button or press it into a recess. Apply pressure to the back of the cap to release the lock. Push the tip of the baton against the palm, a body part or inside of a baton scabbard. The stainless steel cap is strong. It provides a clean sleek appearance. Release is quick and simple.

SPECIFICATION:

- Coated stainless steel
- Strong
- Gross motor function
- Pressure from any location

PERFORMANCE:

Press to release the baton lock from any location of the back of the cap. Push the tip of the baton against a body part, the inside of a baton scabbard or the palm.

SALES STRATEGY:

Show the clean, sleek appearance of the Talon Baton cap. Demonstrate how pressure can be applied to any location on the back of the cap. Illustrate the ease with which the baton can be closed by pushing the tip against a body part, the palm or inside of a baton scabbard.
