

ASP FACTS

FEATURE: Two Position Release

ADVANTAGE:

The proprietary aerosol container and specially produced valve system of the ASP Defender Series provides straight line dispersion of Oleoresin Capsicum. The safety requires two distinct movements for activation. Defender bodies are precision machined from aerospace aluminum. Internal components are engineering grade Delrin.

SPECIFICATION:

- Precision machined aluminum body
- Two-stage Delrin actuator
- Rapidly reloaded
- Easily carried
- Horizontal activation
- Push away safety
- Proprietary aerosol can
- Specially produced valve

PERFORMANCE:

Design of the Defender places inconspicuous force in the palm of your hand. Acceleration to OC pain compliance is rapid and effortless. Holding the Defender in the traditional ready position, push the safety off of the body. The OC is activated with a separate inward pressure.

SALES STRATEGY:

Demonstrate the tactical advantage of an integrated pepper spray and expandable baton control system. Illustrate the ease of attachment and transport. Demonstrate the safety of the dual release activation system.
