

ASP FACTS

FEATURE: Three Pawl European Lock Set

ADVANTAGE:

European Lock Sets provide three independently functioning locking pawls that each secure the handcuff bow. The ability of a subject to shim the lock is drastically reduced. The stacked pawls are narrower than the bow width preventing shimming from the side. End shimming requires a shim that is the exact width of the stacked pawls.

SPECIFICATION:

- Snap-in Lock Set
- Replaceable
- Two-sided keyway
- Stainless steel keyway
- Welded steel post
- Two-sided lock pawls (3)
- Split leaf spring
- Stainless divider plate
- Lightweight double lock bar
- Two-sided double lock bar
- Green double lock indicator
- Same direction single and double lock release
- Cannot be removed while the cuff is in place

PERFORMANCE:

The three independent pawls of the European Lock Set provide an extra measure of security against shimming. ASP single pawl Lock Sets cannot be shimmed from the side. Three Pawl Lock Sets also guard against end shimming.

SALES STRATEGY:

Demonstrate how the ASP Lock Sets prevent side shimming. Show the added protection against end shimming provided by the three independent pawls of the European Lock Set.
