

ASP FACTS

FEATURE: Key Pocket

ADVANTAGE:

The key pocket provides a convenient place to secure a spare handcuff key. It provides a concealed, yet accessible backup key for training and tactical personnel.

SPECIFICATION:

- Underside of the belt
- Leather pocket
- Cut to the key profile
- Molds to the key contour
- Inset into the belt
- Naturally secure

PERFORMANCE:

A spare key is easily and inconspicuously carried in the key pocket. It is hidden from view on the underside of the belt. The leather pocket is cut to the profile of the key and forms to its contour. The pocket is inset into the belt. It provides an ideal way to carry a backup key.

SALES STRATEGY:

Show how a Pentagon Handcuff Key fits into the key pocket. Explain the use of the pocket by training and tactical personnel. Demonstrate the natural security of the pocket on the underside of the belt.
