

MILITARY SUPPORT

Military and defense personnel in conflicts throughout the world are increasingly assuming the role of peacekeepers in regional policing operations. These expanding functions require new technologies and new skill sets. To fulfill these new missions, forces from the US military to the UN have turned to ASP for the intermediate force designs required in the international policing environment.

BATONS Available in 80 configurations to meet all mission requirements, ASP Batons are available in three lengths (16, 21, 26) with four shaft options (Airweight, Black, Chrome, Chrome, Electroless), three grip styles (DuraTec, Foam, Wavemaster) and two expansion systems (Friction Loc® and LeverLoc®). LED Batons present a combined weapon system. Specialized Grip and Leverage Caps increase retention and striking potential. SideBreak®, Federal® and Duty® Scabbards secure a retracted or expanded baton.

RESTRAINTS The field proven standard for special operators, ASP Tri-Folds® are the most compact and secure disposable restraints on the market. They are conveniently carried and rapidly applied. Restraints are easily removed with the compound leverage of the Scarab® Cutter.

LIGHTS The ergonomic actuator of ASP LED products forms the foundation of ASP tactical flashlights. Designs are brighter, cleaner and whiter than any competitor with tactical features never before seen in handheld lights. From the traditional form factor of the Triad® to the compact profile of the Tungsten®, ASP LEDs have set a new standard for tactical illumination.

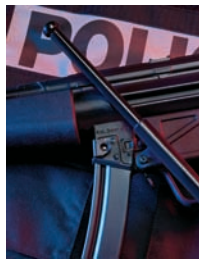

TRAINING Military training in the urban environment requires equipment that is as specialized as the mission. Training Bags and Training Batons, Red Guns® and Knives, Training Tri-Folds®, Whatever the tactical need, ASP provides the training products and support.

BATON CONFIGURATIONS

Airweight shafts are forged from 7075 T6 aluminum. They are light, strong and easily deployed.

Black Chrome shafts are durable and low profile.

Chrome shafts create a dramatic presence that often ends a confrontation when deployed.

Electroless Shafts are ideal for high humidity and salt water environments.

	DURATEC	FOAM	WAVEMASTER
AIRWEIGHT	DA	FA	WA
BLACK CHROME	DB	FB	WB
CHROME	DC	FC	WC
ELECTROLESS	DE	FE	WE

Baton Lengths are a compromise between convenience of carry and performance. Longer (26) batons provide greater striking potential. Shorter (16) models are concealable. 21 Batons are easily carried.

ATTACHMENTS

Grip Caps secure a baton firmly in the hand.

Leverage Caps enhance striking potential while increasing weapon retention. They allow a 16 Baton to strike like a 21.

BreakAway subcaps provide instant access through tempered glass windows.

Fusion OC Batons combine straight line activation system of the Defender with the proven dependability of the ASP Tactical Baton.

Sidebreak Scabbards may be attached to any military web belt.

Duty Scabbards employ elastic side retention technology to retain an expanded or retracted baton.

DuraTec Grips are extremely rugged. They are molded directly onto the baton handle.

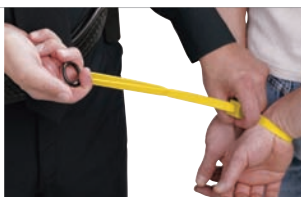

Foam Grips are comfortable, yet secure.

Wavemaster Grips provide an extremely secure hold in virtually any environment.

SUPPORT

Tri-Folds are compact, secure and rapidly applied.

Scarab Cutters remove restraints with compound leverage.

Training Bags are built to withstand the impact of realistic expandable baton training.

Training Batons may be used for high fidelity baton or restraint training.

Red Guns are ideal for close quarter and weapon retention training.

Red Knives allow full contact edged weapon drills.

Training Tri-Folds allow repetition with reusable restraints.

Training Cuffs may be released by rolling the wrists.

Chain and Hinge Cuffs are lightweight and produced in military colors.

Triads are the brightest LED lights in the industry.

Tungsten LED lights use a revolutionary new light engine.

Fusion LED Batons blend high intensity solid state illumination with a field proven impact weapon.
