

Red Gun® Training Equipment

The police firearm is an officer's most distinctive piece of service equipment. Each year a significant number of law enforcement personnel are shot with their own weapons. Weapon retention training as well as weapon disarming procedures are critical law enforcement skills. In addition, police personnel must learn to routinely carry firearms and master the safe handling of weapons under stress. Officers must acquire weapon safety skills for use while moving, when searching and during room clearance procedures. Red Guns provide rugged, lightweight training replicas that are precisely detailed to create a safe training environment.

- Lightweight
- Realistic Replicas
- Exacting Tolerances
- Distinctive Color
- Reinforced Construction

ASP Red Guns . . . Making Safety Training Safe

The reality of
the street . . .
molds the Red
Guns of ASP

The use of real weapons during training classes has resulted in far too many law enforcement students and instructors being seriously injured with "unloaded" firearms and "safe" knives.

ASP Red Guns® provide realistic training replicas of actual law enforcement equipment.

Red Guns are lightweight and forgiving in the training environment. Because they are reinforced, Red Guns have the durability necessary for continuous training use.

Precision molded Red Guns fit high security law enforcement duty holsters.

Red Guns provide a safe means of training law enforcement personnel to handle, transport, retain and present firearms.

In every significant training detail, Red Guns replicate the exact appearance and handling characteristics of duty firearms.

The distinctive molded-in color of Red Guns readily identifies them as "safe" to the public and in the training environment.
