Dear Dr. Parsons:

On June 15, 1990, we received an assortment of ASP collapsible batons and instruction manuals. These batons were thoroughly tested by members of our Hostage Rescue Team (HRT) with the intent of causing them to break or bend. We found the batons virtually indestructible and have submitted an order to your company for seventy (70) black ASP twenty-one (21) inch batons with foam handles.

We are still searching for a suitable scabbard which can be worn with business attire and provide easy access. The two (2) scabbards sent by your company were not satisfactory since there was a continued difficulty in gaining quick accessibility.

We appreciate your cooperation and wish to be notified of any new products your company develops along these lines in the near future.

Sincerely,

Richard M. Rogers
Commander - Hostage Rescue Team
