RE: EVALUATION OF EXPANDABLE BATON

=====

Mr. Roegner, I would like to thank you and Armament Systems and Procedures (ASP) for the opportunity to test and evaluate the ASP Products.

In September of 1989, Sheriff Knupp started the first Special Weapons and Tactics team in the history of Lake County.

As you will know, starting with nothing and formulating a fourteen man SWAT team takes a total commitment of time, money and training. Time and training was the easy part. The money was hard.

The Board of Commissioners at the last minute gave the Sheriff \$76,000.00 to purchase all the equipment needed.

The money had to be spent and equipment received within 31 days. We ordered all the equipment from SWAT van to repelling gloves and received it all within 31 days.

Without the opportunity to test or evaluate the equipment, we ended up with equipment that would not perform and some that was just below minimum standards, and it took almost a year to get the equipment exchanged.

I am delighted to say that the ASP products have performed very satisfactory.

I would like to thank you and your staff for sending the ASP products for evaluation.

At this time, I am returning the ASP products by way of UPS along with the field evaluation.
